

## Consultation Formats

### Telephone consultation with 1 SETC staff member (FREE)

A telephone consultation provides specific suggestions to the school team via a telephone conference with one of the SETC staff. Telephone consultations are brief (1 hour or less). Any school team members that wish to attend the telephone consultation are welcome to attend. However, it can be conducted with just the primary contact person, in which case he/she will be responsible for sharing information with the other school team members that work with the student.

### Webinar/video consultation (\$300)

A webinar or video conference consultation may be conducted via our ReadyTalk webinar system, Zoom or Skype. Web-based Consultations run approximately 2 hours and involve one or two SETC staff members, depending on the student's needs. A 1 hour, web-based follow-up training is included.

### Face-to-face consultation (\$600)

A face-to-face consultation may occur at one of the SETC office sites (Spokane, Ellensburg, or Tacoma.) or at a school district site. School site consultations are recommended when:

- it is difficult to transport the student, and
- the SETC team must meet the child to make sound recommendations

Consultations conducted at the school site have the added benefit of allowing the SETC team to see the child in his/her classroom environment(s). The SETC is able to conduct only a limited number of school-site consultations during the course of a given school year. Face to face consultations often run between 2-3 hours and include a follow-up webinar to support implementation of technology.
